WITH A 5 STAR SAFETY RATING ANCAP HOLDEN

Smarts for first car buyers

**Special advertising feature with advert.*

Buying your first car is a life-changing experience; full of excitement yet also potentially fraught with angst.

So, you've done your online research and realise you've got options. There's the charm of buying a vintage used car and trying to keep it on the road. Or buying a new car. The basic model of course - you know, without the AUI error or Bluetooth connectivity. Or buying a new car. The basic model of course - you know, without the AUI error or Bluetooth connectivity.

Well, the car looks good, is reliable and you still have CDs, right?

But it is really too much to ask for a new car to be affordable, safe, stylish, modern and have the gadgets you use constantly as part of your life?

Not if that new car is the all-new Holden Spark...

Shop smartly - change is coming

The arrival of the all-new Spark heralds a redefining and reimagining what it means to buy your first car. You can forget having to rifle through your glove box for the next CD or settling for a bare-bones new car. And now for the first time, you don't have to drive a big, high-end car to have the gadgets you need and want at your fingertips.

All the mod-cons

It's 2016 and the all-new Holden Spark is teched up. Both Apple CarPlay and Android Auto functionality are standard and this stylish, zippy city-car packs with other smart features.

Need to text Mum to tell her you're home late? The Spark's web-mounted controls can also be used to control your phone.

Want to scroll through the songs in your music app? The Spark's built-in touch screen or voice activation. The small Spark will even cater to you in how smoothly the sun's filtering. Or not. Or how to get to the office. Or how to get to the office. Or how to get to the office.

Mum and Dad will love it too!

As far as safety and reliability go, Holden Spark has it covered too.

With its advanced, push-button start with sensor key technology available, stability control, traction control and a predicted 5-star ANCAP safety rating, Holden has ensured your safety and satisfaction.

The new technology in the Spark adds a whole new level of safety - a smartphone-connected car can be tracked with GPS and call emergency services in the event of an accident.

And the voice activation available for your most used apps means you'll never have a reason to pick up your phone while driving.

Can I really afford it?

Yeah! Starting at just \$13,990, the all-new Holden Spark is in the value-for-money sweet spot.

It comes with a strong warranty, available assistance and lifetime capped price servicing. And although the standard kit has more than generous features, for a little extra you can also upgrade to a Driver Assistance Pack, which includes reversing sensors, a host of new camera, cruise control and more.

So out away your piggy bank, stop worrying about how long that used car would stay in one piece and get ready for the arrival of the Holden Spark.

From its release in April, first time buyers will no longer be limited to daydreaming of owning a car which has the high-tech level you need.

Thanks to the new Holden Spark, change is coming. Which really just leaves you to ponder #modcons.
